

# 102. Binary Tree Level Order Traversal

Medium

[🔖 Topics](#)

[🏢 Companies](#)

Given the `root` of a binary tree, return *the level order traversal of its nodes' values*. (i.e., from left to right, level by level).

Example 1:

Input: `root = [3,9,20,null,null,15,7]`  
Output: `[[3],[9,20],[15,7]]`

Example 2:

Input: `root = [1]`  
Output: `[[1]]`

Example 3:

Input: `root = []`  
Output: `[]`

Constraints:

- The number of nodes in the tree is in the range `[0, 2000]`.
- `-1000 <= Node.val <= 1000`
