448. Find All Numbers Disappeared in an Array

Easy   Topics   Companies   Hint

Given an array `nums` of `n` integers where `nums[i]` is in the range `[1, n]`, return *an array of all the integers in the range* `[1, n]` *that do n*

Example 1:

```
Input: nums = [4,3,2,7,8,2,3,1]
Output: [5,6]
```

Example 2:

```
Input: nums = [1,1]
Output: [2]
```

Constraints:

- `n == nums.length`
- $1 <= n <= 10^5$
- `1 <= nums[i] <= n`

Follow up: Could you do it without extra space and in `O(n)` runtime? You may assume the returned list does not count as extra space.
